

Department of Chemical Engineering

Course Syllabus

Course Code & Number	CHE 473																										
Course Title	Desalination																										
Credit & Contact Hours	3 Credits; 3 Lectures, 0 Laboratories (3-0-3)																										
Instructor	Dr. Mohammad Anwar Parvez																										
Office Location	Room# 2303																										
Instructor's Office Phone	00966 13 720 5175																										
Instructor's Email	maparvez@uhb.edu.sa	Homepage link	https://www.uhb.edu.sa/Pages/MemberDetails.aspx?Param=college&Ref=29&Member=440																								
Prerequisites	CHE 304, CHE 303																										
Course Description	Description of methods of water analysis and treatment. Study of properties of water and aqueous solutions. Detailed discussion and analysis of design, maintenance, energy requirements and economics of the major processes of desalination such as distillation, reverse osmosis, and electrodialysis.																										
Course Objectives	<ul style="list-style-type: none"> i. Provide a comprehensive study on the fundamentals of water desalination. ii. Equip students with analytical tools to understand and apply theoretical principles related to the process, mass and energy balance of desalination systems. iii. Enable students to understand design, operation, and maintenance and to evaluate the performance and economics of the desalination process. 																										
Required Textbook	<p>Hisham T. El-Dessouky, Hisham M. Ettouney, Fundamentals of Salt Water Desalination, 2002 Elsevier Science B.V.</p> <p>Jane Kucera, Desalination Water from Water, 2014 by Scrivener Publishing LLC.</p>

Course Learning Outcomes & Mapped So's	<ul style="list-style-type: none"> ➤ Identify the world and regional areas of water shortage and be able to select the proper desalination method to solve a water shortage problem. (SO 1) ➤ Carry out the basic process calculations of the main desalination processes (SO 2) ➤ Define the performance of different desalination processes and the factors affecting them (SO 4) ➤ Apply new knowledge to be life-long-learners (SO 7)

Weeks	List of Topics																		
1-2	Introduction to desalination																		
	Need for desalination, Composition of seawater, classification of desalination systems																		
	Quality of Water and Requirements for Various Applications																		
3	Chemistry and Properties of Saline Water																		
	Quality of Water and Requirements for Various Applications																		
4-7	Pre-treatment of Feed Water																		
	Conventional thermal desalination																		
	Thermodynamics and Design of MSF Plants																		
8-11	Thermodynamics and Design of RO Plants																		
	Techno-Economic Evaluation of Desalination Plants																		
12	Scaling & Corrosion
